

ACA Contraceptive for Religious Affiliate Group Drug List

Preventive care can help keep you healthy and may even save your life. Getting routine health exams and screenings can help catch problems early, when they're easier to treat. And getting the right preventive care services can help you manage your health conditions and stay healthy.

Under the Affordable Care Act (ACA), pharmacy benefits must cover certain categories of preventive care drugs and products at 100%. That means you don't have to pay a share of the cost — no copay, deductible or percentage of the cost (coinsurance).

How do I get these drugs at no cost?

Talk with your doctor about choosing the medication or product that's right for you. To get these preventive drugs, including over-the-counter (OTC) drugs or products:

- They must be right for your age and condition.
- You'll need to get a prescription from your doctor (even for OTC products).
- Remember, only you and your doctor can decide on the medications you need and what's best for your health.

Preventive drugs and products, by category

Here's a list of medications Carelon plans will cover with no cost-share for you under the ACA. Keep in mind that this list can change. Brand-name drugs are listed with a first capital letter. Non-brand drugs (generics) are in lowercase letters.

Contraception

{This benefit also applies to those younger than age 19. A cost share may apply for other prescription contraceptives, based on your drug benefits.
